

Heather Bone

Managing Director, RebusJ Sustainability

Heather has worked for 20 years in environmental and sustainable development law, commercial, business development and marketing roles in mines and energy, transport and logistics in Australia and internationally and has worked extensively with numerous government departments, industry associations, scientific bodies, OEMs and international organisations. Heather is a qualified HAZOP facilitator and a Member of the Industry Advisory Committee to the Head of School of Chemical and Biomolecular Engineering for the University of Sydney.

She is Deputy Chair and a Director of Bioenergy Australia as well as two privately owned start up alternative fuel companies. Heather was Australia's representative for Climate Change and Renewable Energy for a four week program run by the US State Department at the invitation of then US Secretary of State, Hilary Clinton and is the Chair of Australia's mirror committee for the development of ISO Sustainability Criteria.
